

About VR Glass

VR glass is a simple, fun, and affordable way to experience virtual reality with your Karbonn VR enabled smartphone.

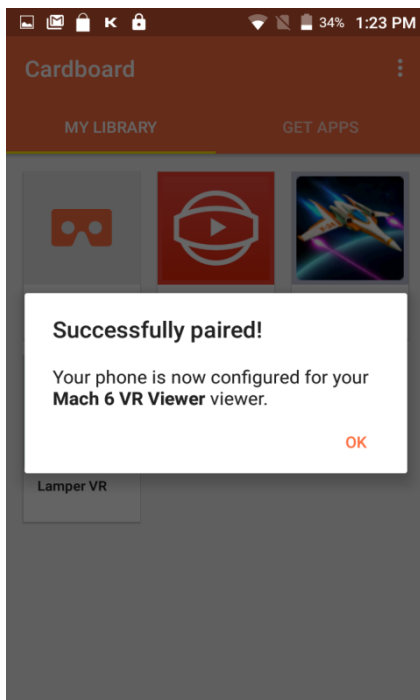

You can explore 3D worlds and play games using the VR glass with your Karbonn MACH Six VR. When you get your VR Glass, you should always pair it with your phone for the **Best Experience**.

Pairing your phone with VR Glass

To start using VR Glass with your smartphone, download the [Google Cardboard app](#) from the [Play Store](#) (Android).

Open the Google Cardboard app and follow the setup instructions.

1. Scan the QR code mentioned on the Gift Box or from here using your phone's camera.

- a. You need data connection for pairing your device. Wait till you get a pop up as shown.

2. Place the Karbonn MACH Six VR inside the VR glass

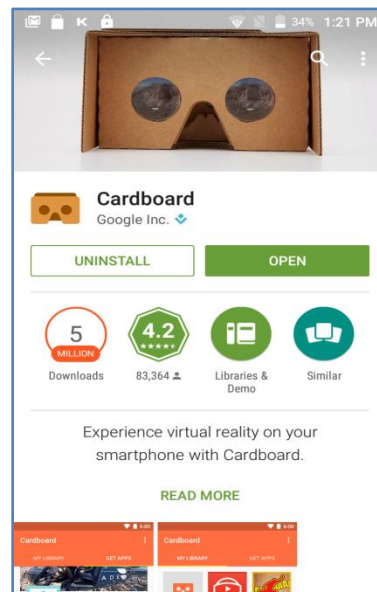

PLACE DEVICE HERE

3. Tap on “Lamper VR: First Flight” which is preloaded on your home screen of Karbonn MACH Six VR.

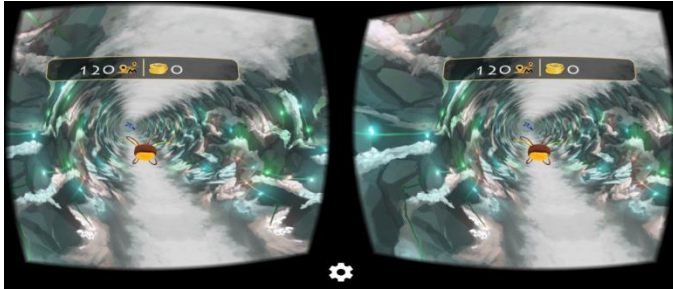

Lamper VR: First Flight

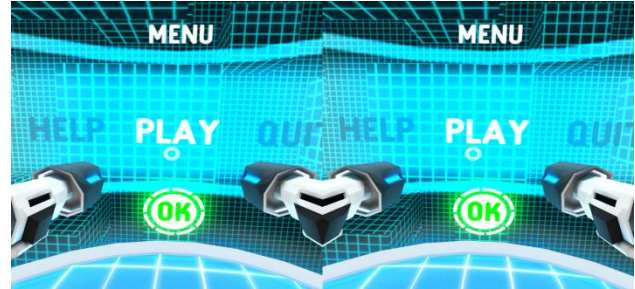

4. You can download more apps to use with VR Glass by touching **Get More Cardboard Apps** or visiting the [Play Store](#).

5. **If you can see the vertical line while using the VR Glass:** slide your phone left or right until the line disappears.

After Pairing, Optimized & Best experience

Without Pairing, Dual image issue (Not Recommended)

6. **Turn up the brightness** on your phone screen.

7. **To focus better:**

- I. After your phone is properly set up inside the VR Glass, look at an object that is far away.
- II. Close your eyes and bring the VR Glass up to your face.
